TOSHIBA DELIVERS IT ALL

The well-equipped company looks for products that outperform. Products that deliver value day after day. And products that leave them well-prepared for whatever the future may bring. Which is why today's most successful companies choose Toshiba business telephones and consoles. After 40 years of innovation, Toshiba knows what works and what businesses need to work.

IT ALL BEGINS WITH RELIABILITY

Toshiba business telephones and consoles are designed to take the knocks of any busy workplace. We add in an ingenious concept called simplicity that makes advanced features easy-to-use and easy to customize. High performance doesn't have to mean highly complicated. Most importantly, we ensure all our equipment is future-ready. So that the system you purchase today will be the system you can continue using and expanding down the road.

NO LIMITS

IP telephony is here—eliminating long distance charges between branch locations, extending telephone system capabilities to remote locations, seamlessly connecting wired and wireless systems, and taking Internet ROI to a whole new level. Toshiba IP technology gives you the power to use your private intranet or the Internet to extend full telephone system functionality to any location in the world.

ONE BRAND—SO MANY ADVANTAGES

- A technology leader since 1965
- Diverse line of business telephone solutions
- Seamless interoperability between solutions
- Customizable and programmable features
- Powerful, easy-to-use software
- IP and future-ready

CLARITY COMES STANDARD

THE CHOICE IS PERFECTLY CLEAR

When good communications is absolutely essential to doing business, Toshiba digital speakerphones are the superior choice. That's because we design our telephone systems to give you plenty of options and features. So your equipment adapts to you, not the other way around.

ADVANCED DIGITAL SPEAKERPHONES

These speakerphones feature superb ergonomic styling. Comfort is priority one. Intuitive buttons and features are designed to make your telephone an extension of how you work. Pure digital clarity is a Toshiba trademark—whether you're using the handset or the speakerphone. Accept nothing less from your communications system. And the ability to program functions makes accessing features as easy as pushing a button.

DIGITAL DISPLAY SPEAKERPHONES

For busier call environments, choose a Toshiba Digital Display Speakerphone, giving you a mini-command center right on your telephone's large, easy-read display. You'll not only have easy access to an extensive feature set for taking, saving, forwarding, and managing your calls, but you will work smarter, minimize training time, and dramatically enhance productivity.

IP SETS YOU FREE

IP telephony lets you take full telephone functionality anywhere you go, whether it's down the hall, into the conference room, or across the country. Using the Internet or your intranet and any of Toshiba's IP telephones and SoftIPT™ software for IP-ready notebooks, tablet PCs, and PDAs, you can roam where your intranet or wireless local area network (WLAN) goes—taking full data and voice functionality with you. What a way to maximize your resources.

GO CORDLESS

Discover a whole new level of flexibility and versatility with cordless technology. Toshiba cordless digital telephones use your existing legacy telephone wiring, yet give you full digital capabilities and quality. Switch between cordless and digital desk telephones during a call. Access full messaging and calling features wherever you roam. And enjoy high-performance spread spectrum and narrow band technologies for call clarity, security, and optimum signal strength.

HIGH-VOLUME? GO HIGH-PERFORMANCE

The Strata® Attendant Console offers its simplicity in call management. It puts everything you need to answer and manage calls with extraordinary ease. Your console displays caller ID, dialed number information, station status, call times and lengths, name and number directories, and other key information.

SoftIPT softphone client for your PDA

SoftIPT softphone client for your notebook PC

Cordless digital 900 MHz spread spectrum telephone provides maximum range and security

Cordless digital 900 MHz narrow band telephone provides excellent range at an affordable price

Strata Attendant Console

GO–UNITE–PRODUCE

The Strata Attendant console works seamlessly with your existing Toshiba communications system. In conjunction with the Toshiba Strata CIX™ system, simply use it like a digital telephone connected with local telephone wiring. To take advantage of IP connectivity, plug into the Toshiba Strata CIX via IP from anywhere on your network. Either system enables you to seamlessly integrate up to four consoles, dramatically increasing your call handling capabilities by automatically distributing incoming call load to multiple attendants.

MORE POWER TO YOUR ATTENDANT:

- Answer Button with Answer Priority and Queuing

- Emergency Call Priority

- Programmable Buttons give you one-touch access to most-used features

- Automatic Day/Night Mode Switching

- Message Center/Voice Mail Transfer

- Call Waiting Count

- Call Status Display with Timer

- Internal Name/Extension Directory

- Outgoing Speed Dial Directory

- Busy Lamp Field enables your operator to see station status at a glance

- Color-coded indicators simplify monitoring various status conditions
