

# We've added to our Technology Portfolio

## Best-of-breed solutions to help our customers grow.

From voice and network to on-premise and cloud services, we deliver solutions to meet all of our customers' technology needs.

### Voice Solutions

To enhance your phone systems and VoIP services. Messaging services, contact centers, conferencing and collaboration tools.

### Cloud Solutions

To support vital everyday business needs. Network connectivity to cloud applications, storage, security, disaster recovery and "as a service" models like UCaaS.

### Network Solutions

To help manage your data and quickly scale bandwidth to meet business and application demands. Bypass public internet traffic, securely transfer data and enhance speed and reliability.

### Data Solutions

To improve end-user experience with faster page-loading and website-response times, and offer flexibility to adjust bandwidth based on applications and traffic while saving you money.

### Managed Services

To outsource the management of your IT services to expert providers so you can focus more time on strategic and revenue-generating initiatives.

### Ensuring a smooth transition from your current technology to your newest.

We're the powerhouse behind you that sources, installs and provisions best-of-breed technologies that help you grow. Our partnerships allow for the largest and best pre-and-post-sales operations, available to you at no additional cost.
